- 2) ☐ Notice of Draftperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 7. 6) ☐ Other:

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-9 and 35-43 are rejected under 35 U.S.C. 102(b) as being anticipated by Stockley (GB2230608). The Stockley reference discloses transmitting a signal which includes a ring-down portion, storing the return signal (see Fig. 5); using this stored signal to detect echoes 11 in subsequent signals (see Figs.4 & 6) as recited in the aforementioned claims.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 28-31, 33 and 62-70 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stockley in combination with Perdue (4679152). The Stockley reference discloses transmitting a signal which includes a ring-down portion, storing the return signal (see Fig. 5); using this stored signal to detect echoes 11 in subsequent signals (see Figs. 4 & 6) as recited in the claims. The difference between the Stockley reference and the claims is that the claims recite the utilization of a robot. The Perdue reference teaches that it was well known in the art to utilize echo systems in combination with robots. It would have been obvious to modify the Stockley reference to utilize in combination with a robot as motivated by the Perdue reference to enable the Stockley system to guide a robot to specific location or to avoid collisions.
